The new infotainment system developed exclusively by Ferrari Genuine for these models lets owners upgrade their car with state of the art navigation, connectivity, multimedia and audio entertainment technology.

The system, which is fully integrated into the vehicle, enables drivers to use all the original functions without altering the ergonomics of the original controls and, by way of an additional touch pad perfectly integrated into the center console, use the innovative functions available.

The new system has a built-in latest generation 3D navigation system, HDMI input, USB input, Bluetooth connection and possibility of connecting latest generation smartphones.
