## LIVERY

**458  
SPECIALE**

Owners may customize the exterior of their Ferrari by choosing to have sports livery strips painted on the front lid, the roof and the engine compartment lid.

The kit is made up of the templates needed to paint the liveries onto the vehicle, which must then be completed with a clear coat finish. These templates are created specifically for painting in multiple colors using high precision paint application systems, and are made from solvent-resistant materials that do not leave adhesive residue when removed.
