F1 RACING SHIFT PADDLES

458
SPIDER

These F1 paddles, exclusively available as part of the Ferrari Genuine programme, are an accessory developed according to the highest standards of quality and functionality.

Their special extended shape at the bottom and the ribbing in the rear area have been designed for our sportiest customers and guarantee greater precision and smoother gearshifting especially when used on the track.

The centre of the paddles has been bored which reduces their weight without affecting the sporty feel that is the hallmark of all the carbon fibre components designed and made by Ferrari Genuine.
