FERRARI GENUINE 1DIN INFOTAINMENT SYSTEM

FERRARI GENUINE 1DIN INFOTAINMENT SYSTEM

599 GTO

The 1DIN Infotainment system – with a 7" touchscreen – can read all multimedia files directly from Android and Apple® devices via USB or Bluetooth®.

The Parrot® Bluetooth module with integrated microphone is compatible with all latest generation smartphones and lets the driver make hands-free phone calls as well as guaranteeing reliable, clear audio streaming playback.

The integrated navigation system lets the driver avoid traffic jams by calculating alternative routes in real time, while map updates can be downloaded from the internet for 10 years after purchasing the system.

For a safe driving experience with no compromises, the system can also be integrated with a DAB digital radio tuner.

The 1DIN Infotainment system can be sold together with a parking camera which helps the driver identify obstacles close to the vehicle and prevent accidental contact.
