## ELECTRICALLY ADJUSTABLE STEERING COLUMN

*F12 berlinetta*

Ferrari offers its customers a steering column that is electrically adjustable for rake and reach operated by two electric motors which offers you improved driving comfort even when the vehicle is moving and total safety without taking your eye off the road. When the engine is switched on, the steering column automatically moves towards the driver into the last memorised position whereas when the engine is switched off, it goes back to the maximum rake and reach position to make it easier to get in and out of the vehicle.
