TRACK POINT
Brake anticipated
+40 m
Impact +0"250

SPA-FRANCORCHAMPS **27 July 2012**

The Ferrari Telemetry Kit - which is integrated in the multimedia system - monitors the position of the vehicle and analyses and records performance data for each track session. The key parameters recorded may then be viewed directly on the dashboard or on an iPad device or PC.

The telemetry parameters available are: speed, braking, gear selected, acceleration and lap time.

The session performance data may be analysed in even more detail with the exclusive specific application: Ferrari Telemetry App.
