## F8 PERFORMANCE KIT

Ferrari  
**F8 TRIBUTO**

Ferrari Genuine offers a Performance Kit for the F8 Tributo and F8 Spider consisting of a set of carbon fibre wheels and a set of high-performance Michelin tires. This combination effectively contributes to a significant increase in performance. The all-carbon fibre wheels are 30% lighter than the equivalent forged components and an incredible 40% lighter than a set of cast aluminium wheels, and give the car an even more performance-focused, aggressive look.

Completing the kit is a set of Michelin Pilot Sport Cup 2 tires (with the specific 'K' marking indicating Ferrari approval), developed in a partnership between Ferrari and Michelin to offer extraordinary grip and directional precision and let the driver set even faster lap times.

The ultra-light titanium stud bolts included in the kit contribute significantly to reducing the weight of the vehicle, offering tangible benefits in terms of handling and responsiveness under acceleration and braking.

Last but not least, the exclusive and unmistakably Ferrari design of the Performance Kit accentuates the style of these models.
