PASSENGER COMPARTMENT PROTECTION

Ferrari
Purosangue

It is possible to request a complete cover kit for the interior of the car which allows you to preserve the cabin in case you load bulky suitcases.

The cover, made of leather and natural fibres, can be used to protect only the boot compartment or, by folding down the rear seats, to cover the entire passenger compartment up to the front tunnel.

The complete passenger compartment shelter includes the cover sheet and the rubber tray for the boot compartment.
